QuickSearch! FAST and SIMPLE Search Utility!

Put your searches into overdrive! A simple, portable stand-alone utility with optional Clarion source code/template to search any driver and folder! FAST alternative to Windows File Search dialog. Search files, folders, text, or file contents. Search across network drives and calculate CRC32 values.

Features:

- Simple zip file installation. Entire utility in one .exe file with optional help file. No need for complicated installs. Portable.
- Search for files in several drives, directories.
- Search based on extension, file size, file date, file contents, and more!
- Do additive searches - search again without clearing the current results.
- Dump results to a printer or ASCII file.
- Tag and manipulate files - copy, move, delete. Also rename and launch individual files.
- Drill-down text searches.
- Search for image files and preview them along with manipulating (copy/move/delete). This is in a separate window.
- Plus much more!
